Andres 'Dre' Bolivar

New York, NY | *646-327-2864*
dre.bolivar@gmail.com | *drebolivar.github.io*

Creative minded software engineer with a diverse background in analytics, healthcare management and filmmaking. I have refined my ability to deliver innovative and reliable results under high-pressure and unpredictable scenarios. I am curious about how things work and have found that software development perfectly synthesizes the unique skill-set I've cultivated throughout my career.

EXPERIENCE

Student June 2022 - September 2022
Full-Stack Software Engineering Immersive, General Assembly
* Completed 500+ hours of expert-led applied computer science fundamentals using industry's most in-demand technologies. Projects included creating a tarot card reader, a watchlist application, a couple of short games as well as a variety of other projects not highlighted in the portfolio.

Product Support Specialist October 2021 - May 2022
ActiveCampaign
* Effectively resolved a high volume of customer enquiries by diagnosing complex software issues in an accurate and timely manner.
* Identified and implemented product improvements by isolating errors, reproducing bugs, debugging, and providing solutions for customer/platform success.
* Formulate alternative or unique solutions for automations constructed on the platform.
* Collaborate with customers and third party applications to assure successful integration and synchronicity across platforms.

Site Director Apr 2020 - Aug 2021
Convent Ave Testing/Vaccination Site, FEMA
* Supervised the COVID-19 Testing Site that administered testing to New Yorkers during the height of the pandemic.
* Successfully collaborated with teams of nurses, community leaders, and site facilities to schedule New Yorkers to receive the first wave of COVID-19 vaccination safely and efficiently.
* Coordinated with FEMA and New York State local government to keep stock of vaccines at identified vaccination sites, scheduling of nurses/providers, finalized an efficient workflow and floor plan for vaccine administration
* Efficiently updated and implemented policies related to constantly changing guidelines for COVID-19 vaccinations.

Program Manager Apr 2018 - Sep 2021
Community Healthcare Network
* Status Neutral Team is responsible for assisting clients gain access to PrEP/PEP and clients diagnosed with HIV gain immediate access to treatment, regardless of insurance status. Team also provides case management, personalized care plans, referral tracking, and education across three clinical sites.
* Managed program deliverables, policies, data, care plans, and finalized efficient work-flows across different teams/clinics through collaboration.

EDUCATION

Master of Public Health (M.P.H.) - Health Policy Management
CUNY School of Public Health

Certification - Full Stack Software Engineering
General Assembly
