Creative minded software engineer with a drive for developing efficient projects that integrate seamlessly into a variety of platforms and operations. With a diverse professional background in analytics, healthcare management and filmmaking, I have a refined ability to deliver innovative and reliable results under high-pressure and unpredictable scenarios. I am intensely curious about how things work and have found that software development perfectly synthesizes the unique skill-set I've cultivated throughout my professional career.

RelevantExperience_

Software Engineering Immersive, General Assembly
June 2022 - September 2022
Completed 500+ hours of expert-led applied computer science fundamentals using industry's most in-demand technologies.
